

John (Jack) Huffman

jackhuffman424@gmail.com | 805-886-2936

Austin, Texas 78704

Education

Carleton College | Northfield, MN | Bachelor of Arts in Computer Science; Minor in Mathematics (Nov 2024)

GPA: 3.7 **Sports:** Intercollegiate Varsity Football

Relevant coursework | Algorithms, Machine Learning, Computer Systems, Computer Security, Data Structures, Calculus, Linear Algebra, Probability, Data Structures, Statistics, Software Design, Japanese

Work Experience

Full Stack Developer | Spider Strategies (Remote) | Dec 2024–Present

- Lead development of "Impact Assistant" an AI powered chatbot connecting directly to user data and providing advanced insight. Implemented load balancing to reduce contextual overhead and increase result accuracy.
- Built advanced performance management software for both enterprises and government
- Implemented various key components of Spider Impact end-to-end using JS, TS and Kotlin
- Integrated security procedures to support government clients

Assistant Football Coach — Bishop Garcia Diego High School | Santa Barbara, CA | Sep–Nov 2025

- Helped create game plans, run practices, and coach on game day
- Orchestrated defensive schematics and called defensive plays
- Communicated with players and parents to coordinate practices and events
- Fostered a positive, success-driven team atmosphere

Assistant Football Coach | Carleton College | Northfield, MN | Sep–Nov 2024

- Assisted head coach and offensive coordinator with game plans and scouting
- Built Python scripts to accelerate the player recruitment process
- Served as a positive role model for student-athletes

Projects

Play-Smith (www.play-smith.com) | Web Based Football Playbook Creator (2025–Current)

- Developed Full-stack TypeScript application built with React 19, Bun runtime, and PostgreSQL
- Custom canvas system with dual coordinate transformation, SVG vector drawing with Bezier curve manipulation, and bidirectional player-route synchronization for intuitive play design
- 60fps play animation engine implementing position interpolation along route paths with ghost trail effects, progressive route drawing, and configurable playback speeds for realistic play visualization
- Multi-tenant collaboration platform with role-based authorization (owner/editor/viewer), cross-team playbook sharing, session-based authentication and reusable concept system enabling formation-independent plays

Mako Poker | Full-stack Game Theory Optimal poker trainer (2025)

- Architected service-oriented monorepo: React (Vite, Tailwind), TypeScript; Bun/Elysia REST API
- Implemented Python FastAPI CFR solver with PyTorch; profiled and vectorized critical paths
- GitHub link <https://github.com/JohnHuffman824/mako-poker>

Binary Space Partitioning | Lead developer (Apr–Jun 2023)

- Analyzed complexity and implemented BSP to render complex polygons, including traversal and rendering techniques https://docs.google.com/document/d/1_QdBQa3DM32LZN3agpvM3VPVPhvFt2Mbrl0iHB4vZc/edit?usp=sharing

Skills

Programming: JavaScript, TypeScript, Kotlin, Python, React, CSS, SQL, Git, C, Bun, Node.js

Interpersonal: Collaborative Agile delivery and code review, communication and leadership, coaching and community engagement, conflict resolution, ownership mindset, personal accountability
